

FOUR-DRAWER LEGAL-SIZE FILE WITH BUILT-IN SAFE UNIT

FireKing

PROTECTION PLUS™

Safe-in-a-File

Fire and burglary protection in one unit.

The NEW FireKing PROTECTION PLUS Safe-in-a-File offers the ultimate in fire protection and security in a single unit. The top drawer opens to reveal a burglary resistant safe. In the bottom three drawers are our high-capacity FireKing Vertical Files. Like all our files, they carry the Underwriters Laboratories Class 350 one-hour "Record Protection Equipment Classified as to Fire and Impact Resistance" label.

By combining the benefits of a safe and a fire resistant file, the PROTECTION PLUS sets new standards for total protection and ease of use. It also takes up less space compared to separate safe and file units. The PROTECTION PLUS also provides the additional security of a hidden safe.

The PROTECTION PLUS has three different locking systems to provide three levels of security. The three file drawers feature a UL-listed high-security keylock - rated to resist picking and drilling. The inner safe drawer is equipped with a Group II UL-rated combination lock. A cam keylock on the outer safe drawer not

only gives additional protection, it can be used as a day-lock as well.

The Fire King PROTECTION PLUS Safe-in-a-File is available in legal widths. It offers a complete range of accessory and interior options, and are available in nine standard colors (or any custom color you specify) to match your office decor.

■UL-rated to protect your vital documents. The Fire King

PROTECTION PLUS Safe-in-a-File is Underwriters' Laboratories-listed to protect paper records through the following tests: ■ A one-hour fire test in external temperatures of over 1700°F ■ A 1550°F-fire-plus-30-foot impact test ■ A 2000°F explosion hazard test.

Because of its unique steel lattice reinforcement, insulation between drawers, and extra-thick steel panels, the FireKing File is UL-rated to survive a fall of 30 feet-and still keep its contents safe in a fire.

Combined with the fire and explosion-hazard UL ratings, this test proves that FireKing Files are built to survive under the worst conditions. What's more, their oven-

dried, asbestos-free insulation maintains this protection for a lifetime.

Burglary resistant security

The safe is a fully-enclosed steel locker featuring a 1/4" solid door plate to protect against forced entry **We guarantee it.**

Like all our files, the FireKing PROTECTION PLUS carries FireKing's exclusive Lifetime Warranty on all parts. This warranty includes the safe as well . . . previously unavailable in the safe industry. And our Free Replacement Guarantee: if your PROTECTION PLUS Safe-in-a-File ever has to protect your records in a fire and any damage occurs to its fire-protection abilities, we'll give you a new one free of charge.

FireKing®

Vertical File Specifications

Fire and Impact Rating

The Underwriters' Laboratories "Record Protection Equipment" classification includes a one-hour fire test of 1700°F, a 2000°F explosion hazard test, and a 30-foot impact test.

Insulation

The FireKing PROTECTION PLUS Safe-in-a-File's casting is of specially formulated, asbestos-free gypsum-based insulation, oven-dried to reduce free moisture to less than 1/2%. Insulation is reinforced with 1" X 2" 14-gauge galvanized welded-steel wire; and insulation between all drawers makes each drawer a separate insulated container.

Safe

The safe features heavy construction throughout. In addition to the reinforced insulation outer walls, the safe inner walls are made of 3/16" hot-rolled steel. The inner safe door is made of 1/4" steel with an Underwriters' Laboratories listed Group II combination lock and has an internal relocking device which automatically locks the boltwork in case of lock tampering. The safe has a spacious 2.44 cubic foot capacity.

Field-Replaceable Steel Panels

All exterior steel panels are replaceable in the field in the event of minor damage.

Finish

An environmentally friendly, electrostatically applied powder coating to the file gives the FireKing PROTECTION PLUS Safe-in-a-File a scratch-, scuff-, and stain-resistant finish. Plus, a five-stage prefinishing treatment provides unmatched adhesion and rust resistance. The safe is finished in a heavy-duty textured paint for outstanding durability.

Drawer Suspensions

Cradle suspensions are securely mounted with screws to metal posts in the file body. (All drawer suspensions are guaranteed for life).

Drawer Bodies

Each drawer body is built with high sides for use with hanging folders-no additional frames are required.

Drawer Heads

Drawer heads are formed of welded steel, and filled with our specially formulated gypsum-based insulation. Each drawer head is designed for a tight interlock with the cabinet frame making all drawers extra-resistant to heat transfer.

High-Security Keylocks

The three file drawers in the FireKing PROTECTION PLUS Safe-in-a-File are equipped with Medeco (TM) keylocks

UL-rated to resist picking and drilling. These keys cannot be duplicated-except through FireKing- limiting access to authorized keyholders only. The safe outer drawer features a cam keylock which can be used as a daylock.

Drawer Bypass

Works on the three file drawers. In its "up" position, the drawer catch allows a drawer to stay unlocked while other drawers remain locked.

Drawer Pulls

Made of bright chrome-plated zinc, each drawer pull contains an integral index-card holder.

Colors

The FireKing PROTECTION PLUS Safe-in-a-File is available in nine colors:

Parchment	Champagne	
Tan	Sand	Taupe
Platinum	Brown	
Pewter	Black	

Or any custom colors you specify.

Lifetime Warranty

All FireKing files carry a lifetime warranty on all parts, including insulation and drawer suspensions.

Free Replacement Guarantee

If your Fire King PROTECTION PLUS Safe-in-a-File is ever required to protect your documents in a fire, and any of its fire-protective properties are damaged, FireKing will replace it free.
